

TOROIDAL TRANSFORMERS

Toroidal security transformer in according to EN 61558

They are constructed with band core

The most important characteristic is a great efficiency with short dimension

Insulation between the windings is created with mylar tape, it is possible insert in round box or fixing with round gum-washer.

Standard power list with dimension minimum and maximum

POWER VA	DIAM. EXT. mm	HEIGHT mm
20	58-70	24-35
40	78-90	30
50	70-110	20-50
60	90-110	20-32
80	80-100	30-50
100	100-135	25-50
120	105-110	30-40
150	105-145	35-50
200	120-147	35-40
250	112-145	38-56
300	125-135	46-56
350	126-136	47-57
400	135-154	57-67
450	145	68
500	135-145	70
600	165	70
